### PROFESSIONAL SUMMARY

Computer Science graduate and full-stack developer with professional experience building end-to-end business software. I work across frontend, backend, APIs, databases and integrations, with hands-on experience in mobile/offline-first applications, automation and applied AI. Interested in software development, backend/full-stack and internal tools roles.

### PROFESSIONAL EXPERIENCE

#### Software Developer | Mayorista El Gauchito

07/2026 - 09/2026 | Mar del Plata, Argentina

- Developed and maintained internal applications to digitize commercial and administrative workflows, working end-to-end across frontend, backend, data and integrations.
- Contributed to a customer loyalty ecosystem composed of an offline-first Android field app, an administrative web panel and a customer-facing PWA/mobile app, including QR workflows, synchronization, routes and customer data operations.
- Implemented REST APIs, integrations with enterprise systems and external services, data validation, idempotent synchronization and workflows designed for intermittent connectivity.
- Contributed to an HR platform with AI-assisted resume analysis, candidate-to-role matching and recruitment tracking, and extended an internal barcode-based product lookup tool.
- Worked with automated testing, cloud deployments and managed distribution of Android applications.

#### Customer Service & Technical Support | Electronics store

12/2023 - 03/2024 | Mar del Plata, Argentina

- Retail sales, technical guidance, basic diagnosis and repair of electronic devices.

#### Supervised Professional Practice | Laboratory - Universidad Atlántida Argentina

12/2025 - 02/2026 | Mar del Plata, Argentina

- Worked as Scrum Master, analyst and developer on an institutional web application for the Mar del Plata Industrial Park.
- Contributed to requirements analysis, team coordination, web development and data modeling.

### SELECTED PROJECTS

#### Personal finance web application — React · Node.js · MySQL · 2025-2026

Final degree project focused on financial organization, user experience and full-stack application development.

#### Gym management system — Java · MySQL · 2025

Desktop application for managing members, operations and gym data.

#### Personal finance informational chatbot — Python · LLMs · 2025

Conversational assistant focused on personal finance questions and education.

#### Personal portfolio — Astro · TypeScript · CSS

Responsive static site published at [atahualpa.dev](http://atahualpa.dev) to present professional experience, projects and technical profile.

### EDUCATION

#### Bachelor's Degree in Computer Science — Universidad Atlántida Argentina | 03/2022 - 02/2026

### TECHNICAL SKILLS

**Frontend:** React, Vite, Astro, JavaScript, TypeScript, HTML, CSS, Tailwind

**Backend:** Node.js, Express, REST APIs, Python, Java, PHP

**Data:** SQL Server, MySQL, SQLite

**Platforms & tools:** Git, GitHub, Docker, Android, Capacitor, PWA, Vercel

**Other:** C, C++, Godot Engine, LLMs, chatbots and automation

### LANGUAGES & CERTIFICATIONS

**Spanish:** Native | **English:** B2 - Upper Intermediate (EF SET Certificate, 2025) | **Portuguese:** Basic
